

Detoxing From Covid Vaccine Side-Effects

Mainstream media along with mainstream medical have been pounding out the “safe and effective” drumbeat about the Covid vaccines for nearly 3 years. The government spent well over a billion dollars on an ad campaign encouraging (and then mandating) their use. About effectiveness, halfway into that ad campaign in mid 2021 Doctors Anthony Fauci and Rochelle Wallensky reluctantly had to admit that the vaccines do not prevent infection or transmission (the truth is that neither Pfizer or Moderna even tested them for transmission) As far as safe goes, every single drug and vaccine injures some percentage of recipients. The questions about the Covid vax became, after only 9 months of testing during operation Warp Speed, what percentage are getting injured in the real world? And what do the vaccine manufacturers and government agencies do to help the injured? The answer to the first question is very murky at best. The answer to the second question is: virtually nothing!

Unfortunately, I know several Covid vaccine injured people in GP and others from around the country. One GP woman had a severe reaction within minutes creating extreme pain in every joint in her body followed by nearly a year of severe neurological symptoms. After hearing that her issues were obviously vaccine created no local doctor would touch her case. She has since received help from Dr. Peter McCullough in Texas and after a year of misery is feeling much improved. My fit young 21-year-old nephew rushed himself to an ER with chest pain and a rapid heart rate 2 days after receiving the vaccine. He was later diagnosed with myocarditis. Another middle aged woman who hikes, jogs (has completed marathons), and does yoga, said that her heart just didnt feel right after receiving the vax. **This is especially interesting because studies from around the world have shown that nearly 3% of Covid vax recipients tested had elevated troponin enzyme levels. This is a conclusive indication of heart muscle damage.** The damage is often sub-clinical – patients often don't know it occurred but the tests confirm it. And even though they experienced no symptoms immediately the damage can create more significant issues years down the road.

Dr. Peter McCullough is a world renown cardiologist and epidemiologist and the author of over 600 peer-reviewed papers. Since the beginning of the Covid Pandemic he has been on the forefront of early treatment of Covid patients when the mainstream medical response to those infected was to do nothing until they needed hospitalization. A large focus of his practice now is treating vaccine injured patients and those who have so-called “Long Covid.”

Dr McCullough says that the Covid virus spike protein gene is an unnatural lab creation and once inside our bodies is very difficult for human enzymes to break down. He said: “We can't get it out... It causes heart damage, stroke, blood clots, and havoc in the immune system. After a serious infection it can stay in the body a year and half or longer. After the vaccine it may stay forever.”

McCullough now recommends a recently peer-reviewed, effective, 3-part protocol to rid the body of Covid vaccine side-effects or residual issues created by severe or repeated Covid infections, especially for people who were vaxxed - **Base Spike Protein Detoxification (BSD)**.

Nattokinase is a natural enzyme produced by the fermentation of soy. Discovered over a 1000 years ago in Japan, it's often used by naturally oriented doctors as a heart supplement. It's proteolytic and thrombotic so it breaks down the spike protein and blood clots and is

2023 Flu Shot Alternative

This under-the-tongue, homeopathic formula is a safe, effective, inexpensive, alternative to traditional flu shots. Just like the flu shot, it is re-formulated every year to target the flu strains that are predicted to be the most major threats. **This year's version is being formulated right now and will arrive around mid-October.**

After 10 years of European testing, these homeopathic pills proved more effective and far safer than traditional flu shots. One dose per week, for 5 weeks, was the way this formula was originally tested. We offer all 5 doses in one convenient package for \$8.19.

Sunshine is the only place in the US that provides the original directions for use this product was created with. We have 21 years experience with it & we'll help make sure you use it correctly.

also a blood thinner. (I have 8 years personal experience using nattokinase to treat a serious complication after a surgery)

Bromelain is an enzyme derived from pineapple that as of 2020 was FDA approved as a topical treatment for burn victims. In capsule form it helps break down the spike protein and is a blood thinner.

Curcumin is the most active ingredient in turmeric. It has anti-inflammatory capabilities proven in randomized trials and is antiviral.

Dr McCullough said: “this a huge breakthrough. All these are available without a prescription and as long as we follow the doses we don't need prescriptions. **This is huge news for people who have taken the vaccines and now regret it.** These are safe over the counter supplements used in the dosages suggested. If they're on blood thinners they should consult with their doctor.”

Dosage:

Nattokinase: 2000 units twice daily, **bromelain:** 500 units daily, and **curcumin** 500 mg twice daily. Dr McCullough's **BSD** protocol for treating spike protein complications appeared in peer-reviewed literature in the Journal of the Association of American Physicians and Surgeons. I am a layman, but based on my experience using nattokinase, I would double the amount suggested. Protocol duration is 3-9 months. Note: Nattokinase and bromelain should be taken on an empty stomach for maximum effectiveness.

Some of the people I know who suffered medical issues after receiving one of the Covid vaxxes incurred out of pocket costs over \$10,000 in their attempts to feel well again. Incredibly, vaccine manufacturers have immunity for liability for their products (the only products of any kind in the US with such protections). While McCullough's protocol may not help everyone, it is relatively inexpensive, peer reviewed as safe and effective, and its components have a thousand year history of safety – “fast-tracked” they were not.

Relief From Neck Pain And A Lot More

Chris's Success Story

Another year cancer-free and feeling great

75-year-old Chris Hill from GP has a lot to smile about. This is an update of the story he first shared with us one year ago.

Four years ago Chris began experiencing significant neck pain and stiffness which unfortunately coincided with a cancer diagnosis. In addition to addressing his cancer, Chris saw 2 massage therapists for his neck issues but never got relief that lasted more than a day. Then he came to Sunshine and Rob showed him Green Earth Medicinals CBD and decided to try it.

The Results: Chris tried the extra-strength 1500 for about 10 days and woke up one morning, turned & stretched and thought: "this is really cool," no neck pain for the first time in months!

Another benefit Chris has noticed is that the PTSD he has experienced since his Vietnam service is nearly gone.

Last but definitely not least, After extensive cancer treatments, **Chris's most recent blood-work shows he's still in remission! No head or neck cancer and no more small cell lung cancer.** Chris Definitely Has A Lot To Smile About!

**World renown

Many of us remember the CDC claimed that the Covid vax mRNA is so fragile that it dissolves quickly at the injection site and would not circulate and reach vital organs. However, over two years ago Japanese researchers clearly proved the opposite. The spike protein was found in lymph nodes, ovaries, testes, heart tissue, and bloodstream for many months after injection raising myriad questions about potential side-effects. A study published in the Proteomics Clinical Applications Journal in August 2023 showed that for about half the participants mRNA from the jabs may last indefinitely. This is likely because the mRNA from the shots has been modified to resist degradation.

Whether or not the FDA, CDC, and the drug companies ever officially discover or acknowledge the true medium and long-term side-effects of this new technology (that couldn't be fully understood in the 9-month pre-licensure Warp-Speed trials), Dr McCullough's protocol addresses the real-world side-effects many people are experiencing from the residual spike protein in their bodies. His peer-reviewed protocol was proven safe and effective.

Flu Symptoms Usually Come On Very Suddenly and include headache, body aches, the abrupt onset of fever (usually high), extreme fatigue, dry cough, possible runny nose, and general weakness.

Colds Are Milder Respiratory Illnesses Than Flu usually beginning with a sore throat and a runny or stuffy nose. Colds seldom cause a fever over 101. They usually cause copious watery nasal secretions the first few days. Often these turn darker and thicker. Colds usually last about a week.

The 2 biggest differences between colds & flu are, that with flu, the onset of symptoms is usually very sudden and often includes a high fever.

Treating Flu Symptoms, because flu symptoms hit so suddenly, protect yourself by having flu remedies at home and at work. That way you can begin treatment immediately, at the onset of symptoms when it will provide the most benefit. Drink plenty of water to replace fluids lost from sweating. **If you live alone, notify someone who can check in with you periodically.**

Improved Bladder Control

Barbara's Success Story

Barb is now able to get uninterrupted restful sleep

75-year-old Barbara McDonald from Medford had struggled with bladder control for 2 decades. Years ago her doctor suggested surgical intervention. She decided against that. Then her sister told her about a product at Sunshine called **Strength 24** that addresses this problem. Barb decided to give it a try.

The Results: Within a week Barb experienced significant improvement. She went from interrupting her sleep to use the bathroom 3x a night to once and some nights being able to sleep through without needing to get up at all! Barb uses one dropper-full twice a day like the label suggests.

But Wait ... There's More: Barb's 93-year-old mom was getting up 6x a night to use the bathroom. After hearing about her daughter's success decided to try it too. She now only needs to get up twice a night and gets much better sleep.

Even More: ... Barb's 73-year-old sister had struggled with urinary leakage for years. A doctor had suggested a mesh installation surgery that is known to be pretty risky. **She tried Strength 24 too and like her mom and sister, loves the results.**

Strength 24 is a patented extract of Jasmine Flower combined with the natural amino acids L-arginine, taurine, and citrulline. It is a multi-functional healthy aging formula.

Strength 24 was originally created as an anti-aging muscle and vitality enhancer. Many Sunshine customers have felt increased strength and vitality when using it. It was discovered quite by accident that it had a substantial effect on the smooth muscles lining the bladder walls, enhancing bladder control in men and women.

Jasmine flower extracts have been used for centuries in Chinese medicine and all over the world to restore and promote health.
