

Who's Funding The Science?

When your doctor prescribes a drug or recommends a medical procedure, who funded the science upon which they are basing their advice, may be the **most critical question you can ask**. Unfortunately, it appears that over the past 75 years it's a question most doctors have been ill-prepared to answer.

In the early 1950s your doctor may have lit a cigarette during your exam because he (chances were good your doctor was a man back then) was confident smoking was safe. He knew it because he read it in a study. What he probably didn't know and likely hadn't considered was that "research" was **funded by the tobacco industry itself**. Today, we call biased company-funded studies in any field: "tobacco science."

By the late 1950s doctors began telling their patients to eat less saturated fat. The science behind that recommendation was a paper titled "The Seven Country Study" by Dr Ancel Keys. He purportedly showed that countries where people consumed

the largest amounts of saturated fats had the highest rates of heart disease. The biggest problem with the "Seven Countries Study" was that it began as a **22 country study**. Keys cherry-picked the data from the 7 countries that supported his theory and omitted the rest. The most glaring omission was France. After initial data was reviewed and the "French paradox" observed, France was removed. The French paradox completely contradicted Keys preferred narrative. Heart disease in France was very low despite the fact the the French diet included lots of saturated fat - butter, cheese, and rich sauces. In addition, Keys had also made no distinction between naturally occurring saturated fats and man-made ones now known as trans-fats. Any researcher or medical doctor who doesn't acknowledge the major difference between natural and man-made saturated fats should not be taken seriously. Extrapolated in today's dollars, **Keys was paid over \$2 million dollars a year** for his flawed research.

In the early 60s, though unapproved, 2.5 million doses of a new sedative called Thalidomide was distributed "free" by the manufacturer to more than 1,200 U.S. doctors. Unfortunately, among others patients it was given to 20,000 pregnant American women to test its effectiveness treating morning sickness. History has documented it often created heartbreaking birth defects.

Despite this horrific experience in the US of giving pregnant women drugs untested for safety specifically in pregnant women, in 2021 my daughter's local OB-GYN recommended she take the Covid vax in her first trimester of pregnancy. The Covid vax was later proven to be dangerous for pregnant women, especially in the first trimester (and also for those trying to get pregnant). It has been subsequently revealed that many doctors and medical systems received significant monetary kickbacks from drug companies for administering Covid shots. My daughter wisely chose not to follow her doctor's advice.

In 1999 doctors began prescribing Vioxx for arthritis and other pains. It was stronger than ibuprofen and Merck claimed it was effective, "well tolerated," and **had its own company generated safety study to prove it**. What Merck chose to conceal however was that it also had internal followup data that Vioxx roughly doubled the risk of heart attack. Fifty thousand people are estimated to have died

from Vioxx-induced heart attacks and strokes in the next 4 years. Merck eventually settled with the Dept of Justice for \$4.85 billion dollars. No criminal charges are brought.

In the late 90s doctors began prescribing OxyContin. Purdue Pharma trained its sales force to tell doctors that the addiction risk was less than one percent which allegedly **came from their own studies**. Turns out the drug was highly addictive and its pain-killing effects wore off much faster than the originally claimed, 12-hour relief. As patients told their doctors their pain kept coming back, doctors across the country prescribed it in ever increasing doses creating the opioid epidemic. After almost inestimable damage was done, Purdue Pharma's owners, the Sackler family, paid hundreds of millions in fines and declared bankruptcy to avoid paying more. It's estimated the Sackler family in concert with the doctors who believed their sales pitch, cost us the lives of over 500,000 Americans.

Recently, new very credible reports about vaccine side-effects from the childhood vaccine schedule and the Covid vaxxes have surfaced. After decades of parents being assured by doctors that the 72 doses on the childhood vaccine schedule are safe and effective, it turns out that **not a single one was tested for safety against an inert placebo**. This came out when lawyers representing the Informed Consent Action Network (ICAN) filed several Freedom Of Information Act (FOIA) requests to the FDA demanding proof of such tests.

It's become clear that for last several decades that the government regulatory agencies responsible for validating vaccine, drug, medical device, food additive, and agricultural chemical company claims of safety and effectiveness have been corrupted by huge infusions of cash from the very industries they are supposed to be regulating. In 2026, your doctor should be asking: who funded the study, before they confidently endorse or recommend anything, be it their favorite cigarette or childhood vaccines at a routine well-baby visit.

Cardio Tonic-BP Lowers Blood Pressure

**You've Made Sunshine the #1 Dealer
In The Entire United States!**

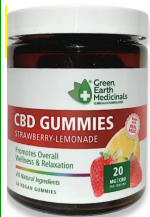

Cardio Tonic-BP is by far the most effective BP reduction formula I've seen in 30 years. What's made it so popular is that you, our customers, have been so willing to share your real-life success stories after using it. Because of you, hundreds of people in our area have brought down their BP to normal range and in many cases have chosen to forgo prescription pharmaceuticals thereby eliminating unwanted drug side-effects. Of all the brick and mortar (actual physical) locations that sell Cardio Tonic-BP in the US, you've made Sunshine #1. **Thank you!**

Cardio Tonic-BP an exceptionally well researched formula that contains one ingredient I haven't seen anywhere else, **Rauwolfia**. From the 1930s thru the 50s this herb became extremely popular, especially in India for treating high BP and nervous conditions. Over 100 scientific articles were written supporting its use. It fell out of popularity when reports of adverse side effects surfaced (that were later proven to be erroneous). Kudos to Natura for including **Rauwolfia** in this highly effective formula.

Cardio Tonic-BP maintains healthy BP, strengthens heart muscle function, and promotes cardiovascular health. It features: **Hawthorn**, the most valuable tonic herb for maintaining a healthy heart, **Arjuna**, an herb that Ayurvedic physicians have used to support cardiovascular health for centuries, **Rauwolfia**, valued for centuries in India and Nepal to support cardiovascular health by influencing nerve impulses acting on the heart and blood vessels, **L-Citrulline**, a precursor to **L-Arginine**, the amino acid essential for nitric oxide production which relaxes blood vessels to enhance healthy blood flow, **Magnesium** helps keep heart rhythm steady, **Olive Leaf**, **Forskolin**, **Grape Seed extract**, **Ginger**, **L-Carnitine** and a lot more.

Natura Health Products, is highly respected among integrative and functional medicine practitioners for its unwavering commitment to excellence in dietary supplements. Stringent third-party testing guarantees the highest quality and safety of each formula.

Natura founder and master formulator, Donnie Yance, is considered one of the world's foremost herbalists.

Best CBD Gummies Available

**Relieve Pain, Improve Sleep,
Reduce Anxiety, and Enhance Mood
Without Making You High**

Green Earth Medicinals (GEM) full-spectrum hemp extract delivers a full 20 mg of CBD along with all the other cannabinoids, terpenes, flavones, and other plant compounds you expect from serious botanical medicine. These are the most effective CBD gummies you've ever tried ... **GUARANTEED!**

What's missing? All the stuff you find in "bargain" brands: high-fructose corn syrup, preservatives, artificial flavors, dyes, etc.

Enjoy one strawberry-lemonade flavor gummy, twice daily or as needed. Allow 30 minutes or so for onset of effects. All bodies are unique, so effects and durations will vary.

Healthy Breakthrough In Tooth-Care

Most of us use toothpaste as part of an oral hygiene program to clean and possibly even whiten our teeth. Until recently the only ingredient in some toothpaste that could help re-mineralize enamel was fluoride. Unfortunately, fluoride is also a neurotoxin that has now been conclusively linked to reduced IQ in children and even tooth and bone damage if the dose is too high. And it is very easy to exceed doses that have questionably been considered safe.

The Good News: Hydroxyapatite Toothpaste Is Here!

The breakthrough in tooth-care we've all been waiting for has arrived. Hydroxyapatite is a natural mineral form of calcium. It makes up most of the hard parts in human teeth and bone. When used in toothpaste in sufficient concentrations it helps repair tooth enamel, prevents tooth decay, and can relieve sensitivity to hot and cold. **And in double blind clinical testing, hydroxyapatite matched or exceeded fluoride in cavity prevention without the risk of neurotoxicity!** Nano-hydroxyapatite works by filling tiny holes on the surface of your teeth, helping with enamel remineralization. The structure of hydroxyapatite closely matches the natural enamel found on human teeth.

Not All Brands of Hydroxyapatite Toothpaste Are the Same

Particle shape, size, and concentration matter, because small particles stick better to damaged areas during brushing which aids in cavity protection and relief from dentin hypersensitivity. Tooth enamel needs protection against daily acid attacks and wear. Studies show that 10% hydroxyapatite in toothpaste is especially good for protecting against root demineralization and reducing tooth sensitivity. This reduces dental cavities by creating a tougher barrier and keeping oral biofilm in check. **Ollie brand toothpaste with 10% hydroxyapatite helps repair micro-damage in tooth enamel and dentin.** Brands using lower concentrations cannot point to studies proving efficacy.

Fluoride-free Ollie brand toothpaste is the healthy, natural way for adults to restore tooth enamel. And the rest of the ingredients list should satisfy even the most careful parents looking for fluoride-free options to prevent cavities in their kids' teeth while avoiding dangerous chemicals.

**Sale Extended, 10% Off Thru May 23rd
Available in Mint & Strawberry**

Experience Invigorating Results

This comprehensive formula combines the power of 14 proven herbs with the addition of the amino acids L-Citrulline and L-Arginine for even more blood vessel support. **Super Circulation** was created to stimulate circulation, reduce inflammation, and heal the delicate endothelial linings of our blood vessels. This formula is slightly warming and may help relieve peripheral neuropathy especially if you sit or stand for extended periods each day, and enhance mental focus and even libido.
